

Based on all flights (with tracklog) with start in Iceland between 2022-10-01 and 2023-09-30 having a tracklog.

Flights must be registered no later than 7 days after the flight. Only the best flight per takeoff counts.

Scoring is done by using the best score calculated from the following:

* Free flight (5 point distance) * 1.0.

* Open distance * 1.0.

* Out & return distance * 1.25.

* Free (flat) triangle * 1.25.

* FAI triangle * 3.

If you do not want a flight to be visible here you can mark it as "Semi-private" when you edit/save a flight (this will exclude the flight from any public listings).

For any other issues regarding this send an email to flightlog@erdalit.no.

2023-06-07: note that the factors etc was changed today to match what was used last year.
